Summary

• I'm a Full Stack Developer with a passion for building responsive and user-centric applications. Eager to apply my knowledge of front-end and back-end development to solve complex problems and create seamless user experiences. Committed to lifelong learning and staying at the forefront of technology trends. I come from a background in Nursing and see myself as an advocate for health by partaking in various sporting activities such as, gym, running, and football. I firmly believe in the growth mindset and aim to be a little bit better every day.

Skills

Projects

Horse Stable Management App

Terminal Application

- Description: Horse Stable Management app which runs on a terminal command line interface. The app utilises CRUD functions to manage the data which is stored in a JSON file. User entries are validated against a specified schema before outputting either a success or error message. Features include a main menu interface, the ability to either add, remove, update or view horse details. Other features include being able to add and view race logs for all horses in the database.
- Tech Stack Used: Python, Pytest
-

Example

Flask API

- Description:
- Tech Stack Used:
-

Others

- **2nd Place:** Won the 2nd place prize for a Large Language Model (LLM) competition held at nib for developing a Q&A chatbot model specifically designed to answer questions that a National Disability Instance Scheme (NDIS) plan manager may have around a given NDIS plan. **(08/2023)**
